

# STAKE - IT - EASY

Thank you for your purchase of Stake-It-Easy. The product is designed for staking small trees and plants up to 1 ½" (inches) in caliper (diameter). Follow the instructions below for proper staking techniques.

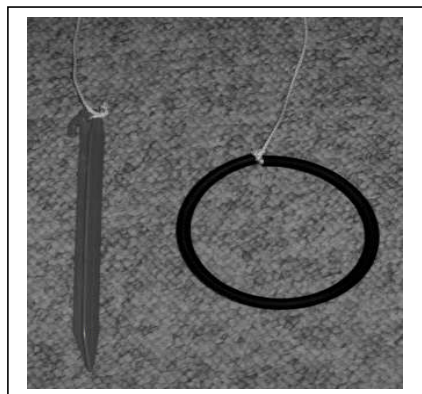

Figure 1

Figure 2

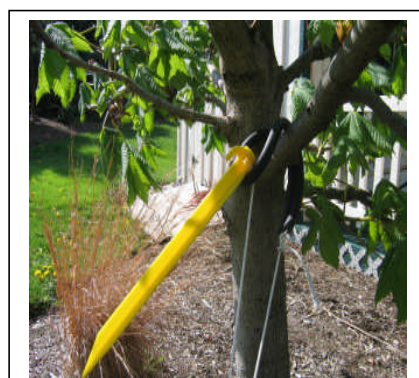

Figure 3

Figure 3-A

Figure 3-B

Each Stake-It-Easy kit contains 3 plastic stakes, 3 rubber branch/stem protectors, and 3 seven-foot nylon ropes that are already fed through and tied to the rubber protectors.

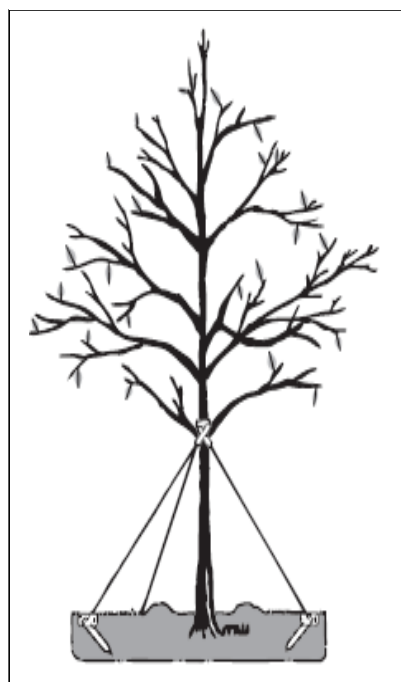

Figure 4

**Step 1:** Insert the end of the nylon rope through the hole in the top of the plastic stake and tie the rope to the stake (See Figure 1).

**Step 2:** Fold the rubber branch/stem protector in half lengthwise so that the two open ends are adjacent to each other (See Figure 2).

**Step 3:** Wrap the rubber branch protector around one of the lower branches or the stem of your small tree or plant. Feed the stake and the end of the nylon rope through the loop created by the rubber branch protector (See Figure 3). Pull the remaining rope through the loop and secure the rubber protector snug against the tree branch (See Figure 3-A) or the tree stem (See Figure 3-B).

**Step 4:** Gently pull the stake and rope taught so that your small tree or plant is adjusted to its desired position. Gently hammer the stake into the ground (See Figure 4).

Repeat this process with the second and third stake as necessary.

**CAUTION:** For adult use only. Plastic bags, ropes and stakes can present a danger to children. Properly discard plastic bag after opening package. Ensure stakes and ropes are installed and utilized in a safe location and used for their intended purpose only.
